## INFECTION CONTROL: RESPONDING TO HEIGHTENED AWARENESS

Facilities are being called to respond to the current crisis at an unprecedented measure. What kind of resources does a facility need to be equipped for a critical situation like COVID-19 today, and to address the spread of it in the future? Manufacturers are producing the following products in higher quantities in anticipation of evident and future needs. Backed by science, these resources address the spread of present contaminants.

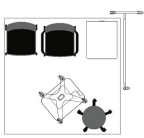

krM can help facilitate these needs. Our firm is here to respond and support you during this time.

## Triage Rapid Response

### QUICK SHIPPING FOR CRISIS

In a time of crisis, mobilizing care is critical. Unprecedented challenges provide opportunities to look differently at delivering care. A variety of 6'x 6' triage environments can provide solutions that are adaptable and flexible in the acute care setting. During a crisis, these solutions can reside in the building envelope, or in pre-fab or temporary areas. We can price and coordinate quickshipping of resources like the ones below to meet immediate needs.

**TYPICAL 1**  
6X6 Crisis Triage

[LINK TO TYPICAL](#) | Qty 2 Event  
Qty 1 Aiden
